20#, 30#, 40#, 50#, 60#, 70#, 80#, 90#

Lightweight

Heavyweight

Sheets or Rolls?

Sheets are generally used when wrapping uniform items and exact paper dimensions are required. They are also used for interleaving within specific sized containers.

Rolls are typically used when void fill is the designated application or when applications vary based on different lengths needed.

Get it Embossed?

Danco's Embossed or "Indented" feature provides extra bulk improving cushioning while reducing paper consumption.

Questions?

Still unsure of which paper is the best option? Call us. We will be happy to talk this over with you.
